iTeach/iLearn Summer
Schedule of Classes

Out of The Box training provides teachers with an introduction to using laptops, SMARTBoards, eChalk and internet safety.

iTeach professional development is designed to enable teachers to effectively organize their laptop for instruction using best practices in file management, email and calendaring features and then use technology tools such as online resources, video, digital images and more to create peer reviewed mini-lessons using PowerPoint.

iLearn professional development is designed to enable a teacher who has access to a projector and classroom set of internet-ready computers to enhance teaching and learning using 21st Century tools.

iCreate professional development is designed to enable teachers to create their own technology-enriched lessons. iCreate professional development guides teachers through the process of incorporating the new technologies they use in iLearn into the lessons they are creating and delivering to their students.

Ongoing Technology Training provides professional development to enhance teacher's use of technology with classes in the use of software such as Word, PowerPoint, and Excel as well as classes in areas such as cyber safety, eChalk, website development, refresher classes in using email, interactive whiteboards, laptops and more.

All classes will be held at the
The Young Women's Leadership School
105 E. 106th St.
New York, NY 10029
